TORQUE

WRENCH

## Note: When installing the brackets and bars, all hardware must be left loose until all the items are attached.

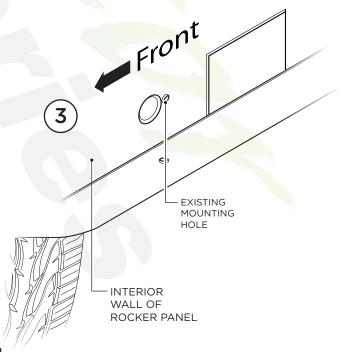

6MM HEX BIT

14MM SOCKET

**1.** Remove all contents from the package and check stainless steel tubes for any damage. Also, verify that all components and hardware listed above are included before you begin installation.

**2.** Read installation manual and installation drawing completely. Understand all brackets and bolts before installation.

**3.** Existing mounting holes are located on the interior wall of the rocker panel. These mounting holes will be used per the following instruction.

**4.** On passenger side of vehicle, align Front and Rear Brackets as shown.

**5.** Front Bracket Cradle faces to the rear of truck and Rear Bracket Cradle faces to the front of truck.

**6.** If specified holes in the wall of the rocker panel are not threaded, remove plastic plug (6a and 6b) and insert U-Nut Clip so that the threads are facing away from you (6c and 6d). Fasten using one (1) M8 x 30 mm Hex Head Bolt, one (1) M8 Flat Washer and one (1) M8 Lock Washer.

7. Complete installation of brackets by placing one (1) Nylon Washer between lower mounting point and pinch weld. Then fasten using one (1) M8 x 30 mm Hex Head Bolt, two (2) M8 Flat Washers, two (2) M8 Lock Washers and one (1) M8 Hex Head Nut. Repeat this procedure for remaining brackets.
