PROCEDURE

- 1. Remove contents from box, verify if all parts listed are present and free from damage. Carefully read and understand all instructions before attempting installation.
 - Failure to identify damage before installation could lead to a rejection of any claim.
- 2. Starting on the driver side, remove the rubber plugs located on the rocker panel at each mounting location. See **Figure 1**.
- 3. **For models with threaded holes:** At each bracket mounting location on the rocker panel there should be a welded factory nut.

- 4. Locate (1) Mounting Bracket (Item 2) and loosely secure it to the rocker panel using the provided hardware: (2) M8 hex head bolt, (2) M8 flat washer, and (2) M8 lock washer. See **Figure 2.**
- 5. Repeat **Step 4** for all remaining bracket mounting locations.

6. Remove the OEM Bed bolts to be used on the top Isolator Bracket (4). Then install the Top Isolator Bracket (4) using the OEM bolts, supplied U-Nut (8), and supplied M12 Bolt, M12 Lock Washer, and M12 Flat Washer. See **Figure 3.**

7. Attach the Bottom Isolator Bracket (5) to the Top Isolator Bracket (4) using the Isolator Kit (7) and hardware. See Figure 4.

- 8. For Step Board installation, tilt board at an angle to insert brackets into mounting locations. With the previously installed mounting brackets use the supplied M8 hardware with the short M8 hex head bolt, then loosely install. See **Figures 5 & 6**.
- 9. Align and adjust the step bars and brackets as needed, then fully tighten all hardware: M8 to 15-18 ft-lbs.
