NANODIAMOND COATING TECHNOLOGY

NANODIAMOND
COATING

DIAMOND QUICK BODY

Fast and Effortless Protection

Diamond Quick Body is an effortless, nanodiamond hybrid SiO₂ spray coating which yields 6 months of hydrophobic protection.

This spray and wipe formula will create a slick, caramel gloss appearance on any coated or non-coated vehicle.

Immediately results in a finish that will resist UV oxidation and repel water easily.

6 months hydrophobic
protection- Easy Spray-on,
Wipe off

Unique, Hybrid SiO₂ Formula

Resists UV Oxidation and
Water Spots

Offers a Slick-Feeling
Caramel Gloss

INSTRUCTIONS

Spray onto the surface area.

Wipe gently over the entire area at least twice to provide even coverage.

Work in sections to ensure correct and thorough application.

Use a dry microfiber towel to remove any excess product and buff to a great caramel gloss shine!
