

D-A COARSE

HIGH PERFORMANCE CUT POLISHING COMPOUND

D-A COARSE

250ml · 1000ml

9.DACOARSE250 · 9.DACOARSE

HEAVY CORRECTION

Pairs best with the D-A Coarse foam pad (or D-A Coarse wool/microfiber pads) for one-step removal of moderate-to-severe defects and sanding marks on most paint systems.

KEY FEATURES

- ✓ Fast-cutting formula removes moderate-to-severe defects and sanding marks in a single step
- ✓ Durable lubrication system keeps the compound consistent from first pass to last, without breaking down early
- ✓ Low-dusting, easy wipe-off formula for less cleanup and fewer towel marks
- ✓ Engineered in-house to pair with RUPES blue foam, wool, and microfiber pads on BigFoot random-orbital and gear-driven tools

HOW THIS COMPARES

- ✓ **Built as one system, not a guess.**
Compound and pad are engineered together in-house by RUPES for the BigFoot platform, so cut and finish are matched from the start — instead of pairing a generic compound with a generic pad and hoping it behaves.
- ✓ **Low dusting means less rework.**
A heavy cutting compound that throws dust everywhere just moves the mess to trim, glass, and adjacent panels; D-A Coarse's low-dust formula keeps cleanup — and the risk of dust re-marring the finish — to a minimum.
- ✓ **Durable lubrication, no early breakdown.**
The compound's lubrication system stays consistent pass after pass instead of breaking down early and forcing a mid-job reload.
- ✓ **Easy wipe-off, every time.**
A compound that's hard to remove eats into labor time on every panel; D-A Coarse is formulated for a fast, clean wipe-off so techs spend time correcting paint, not scrubbing residue.
