

D-A COARSE

COARSE CUTTING FOAM PAD

D-A COARSE FOAM PAD

40mm · 70mm · 100mm · 150mm · 180mm

HEAVY CORRECTION

Pairs best with D-A Coarse compound to remove mild to severe defects — oxidation, deep swirls, heavy holograms — before moving to a finer pad and compound.

KEY FEATURES

- ✓ All-new open-cell foam blends the best of the earlier blue and green formulas for more durability and a more vibrant color
- ✓ Engineered for both random-orbital and gear-driven BigFoot tools
- ✓ Removes mild to severe defects from most paint systems as the initial cutting pad
- ✓ Patented contoured edge and reduced-height design for better pad-to-panel contact through curves and body lines

HOW THIS PAD COMPARES

- ✓ **Built as one system, not a guess.**
Pad and compound are engineered together in-house by RUPES for the BigFoot platform, so cut and heat control are matched from the start — instead of pairing a generic pad with a generic compound and hoping it behaves.
- ✓ **Open-cell foam for real heat management.**
Heavy cutting generates real heat; this pad's open-cell structure is built to manage it, instead of trapping heat the way denser closed-cell competitive pads can.
- ✓ **Contoured, reduced-height pad geometry.**
The pad's lower profile and updated foam keep more surface in contact with curves and body lines than older flat-pad designs, reducing the pigtailed and holograms a mismatched pad/compound combo can leave behind.
- ✓ **Factory-fresh every time.**
Each pad ships in its own sealed, UV- and moisture-protected flow pack — no dust contamination or premature foam breakdown, a common shelf-life issue with bulk-packaged competitive pads.
