

D-A FINE

HIGH PERFORMANCE FINE POLISHING COMPOUND

D-A FINE

250ml · 1000ml

9.DAFINE250 · 9.DAFINE

REFINEMENT & GLOSS

Pairs best with the D-A Fine foam pad for moderate-to-fine defect removal and a high-gloss finish — whether following D-A Coarse or used on its own on paint that's already in good condition.

KEY FEATURES

- ✓ Excellent cutting performance for a 'fine' polishing compound, without sacrificing finish quality
- ✓ Micro-abrasive technology delivers incredibly high finish quality on most paint systems
- ✓ Easy wipe-off formula means fewer towel marks on soft paints and delicate surfaces
- ✓ Engineered in-house to pair with RUPES yellow foam, wool, and microfiber pads on BigFoot tools

HOW THIS COMPARES

- ✓ **Built as one system, not a guess.**
Compound and pad are engineered together in-house by RUPES for the BigFoot platform, so cut and finish are matched from the start — instead of pairing a generic compound with a generic pad and hoping the combination behaves.
- ✓ **Cuts like a coarse compound, finishes like a fine one.**
Most fine compounds trade away cutting power for finish quality; D-A Fine is formulated to hold onto real defect-removal capability without giving up the high-gloss result a finishing step is supposed to deliver.
- ✓ **Easy wipe-off protects soft paint.**
Soft and delicate paint shows every towel mark a hard-to-remove compound leaves behind; D-A Fine's easy wipe-off formula is built specifically to avoid adding that damage back in.
- ✓ **Versatile enough to skip a step.**
On paint that isn't heavily defected, D-A Fine and its matching pad can deliver a finished result on their own — no need to run a coarse cutting stage first.
