

D-A FINE

FINISHING FOAM PAD

D-A FINE FOAM PAD

40mm · 70mm · 100mm · 150mm · 180mm

REFINEMENT & GLOSS

Pairs best with D-A Fine compound for moderate-to-fine defect removal and a high-gloss finish on most paint systems — whether following D-A Coarse or used on its own on paint that's already in good condition.

KEY FEATURES

- ✓ The most versatile foam pad in the RUPES BigFoot range — effective defect removal with high-gloss finishing capability
- ✓ Same high-performing foam as the classic yellow random-orbital pad, now built for gear-driven tools too, in a more vibrant yellow
- ✓ Handles moderate-to-fine defect removal and final finishing on most paint systems
- ✓ Patented contoured edge and reduced-height design for better pad-to-panel contact through curves and body lines

HOW THIS PAD COMPARES

- ✓ **Built as one system, not a guess.**
Pad and compound are engineered together in-house by RUPES for the BigFoot platform, so cut and finish are matched from the start — instead of pairing a generic pad with a generic compound and hoping the combination behaves.
- ✓ **Versatile enough to skip a step.**
On paint that isn't heavily defected, this pad and D-A Fine compound can deliver a finished result on their own — no need to run a coarse cutting stage first.
- ✓ **Contoured, reduced-height pad geometry.**
The pad's lower profile and updated foam keep more surface in contact with curves and body lines than older flat-pad designs, reducing the pigtailed and hologrammed a mismatched pad/compound combo can leave behind.
- ✓ **Factory-fresh every time.**
Each pad ships in its own sealed, UV- and moisture-protected flow pack — no dust contamination or premature foam breakdown, a common shelf-life issue with bulk-packaged competitive pads.
