

D-A ULTRA-FINE

POLISHING FOAM PAD

D-A ULTRA-FINE FOAM PAD

40mm · 70mm · 100mm · 150mm · 180mm

FLAWLESS FINISH

Pairs best with D-A Ultra-Fine polish for a high-gloss finish on haze-prone or very soft paint — after correction, or on its own when paint only needs light refinement. UNO Pure Ultra Finishing Polish is also compatible. Also doubles as an application pad for sealants and waxes.

KEY FEATURES

- ✓ Purpose-built for high-gloss finishing and polishing on haze-prone or very soft paint surfaces
- ✓ Doubles as a clean application pad for sealants and waxes
- ✓ Delivers a flawless, swirl-free finish to close out the correction process
- ✓ Patented contoured edge and reduced-height design for better pad-to-panel contact through curves and body lines

HOW THIS PAD COMPARES

- ✓ **Built as one system, not a guess.**
Pad and polish are engineered together in-house by RUPES for the BigFoot platform, so the final finish is matched from the start — instead of pairing a generic pad with a generic polish and hoping the combination behaves.
- ✓ **Gentle enough for the paints that punish shortcuts.**
Soft, haze-prone, and dark-color paints show every mismatched pad/polish pairing; this pad's finer foam is built to avoid adding the marring it's supposed to remove.
- ✓ **Contoured, reduced-height pad geometry.**
The pad's lower profile and updated foam keep more surface in contact with curves and body lines than older flat-pad designs, reducing the pigtails and holograms a mismatched pad/compound combo can leave behind.
- ✓ **Factory-fresh every time.**
Each pad ships in its own sealed, UV- and moisture-protected flow pack — no dust contamination or premature foam breakdown, a common shelf-life issue with bulk-packaged competitive pads.
