ONE-STEP GLOSS + PROTECTION

Pairs best with the D-A Ultra-Fine foam pad for light correction, gloss enhancement, and protection in one step — or the D-A Intermediate foam pad when more defect removal is needed.

KEY FEATURES

- ✓ Micro-abrasive technology fused with nano protection technology in a single formula
- ✓ Removes minor imperfections while leaving a protective layer that lasts up to 12 months
- ✓ Leaves surfaces noticeably glossier and slick to the touch
- ✓ Compatible with rotary, random-orbital, gear-driven, and triple-action polishers

HOW THIS COMPARES

- ✓ **One step, not three.**
A separate correction pass, polish, and protection product means three sets of pads and three passes around the car; UNO Advanced is formulated to fold light correction, gloss, and protection into one.
- ✓ **Protection that actually lasts.**
A 12-month protective layer holds up through seasons of washing, instead of the few-weeks lifespan of a typical wipe-on protectant.
- ✓ **Built to work across every tool in the shop.**
Rotary, random-orbital, gear-driven, or triple-action — the formula performs the same, so the choice of polisher never becomes the limiting factor.
- ✓ **Built as one system, not a guess.**
Polish and pad are engineered together in-house by RUPES for the BigFoot platform, so the final finish is matched from the start.
